Education Databook 2014

Published by the Timor-Leste Ministry of Education
December 2015

All data presented in this Education Databook 2014 were derived from the Education Management Information System (EMIS) as of 3rd August 2015.

The Education Databook 2014 was made possible due to the continuously enhanced efficiency of the EMIS system and staff. Data collection and entry were done during 2014 not only for the 2014 school year but also for the previous school years. Therefore, additional data from the 2013 or earlier school years which may have been missed were also integrated into and used in this databook where needed.

In order to calculate some indicators such as drop-out rate or repetition rate for 2014, data from the 2015 academic year were also used. The 2015 data which were used as denominators in these indicators are also as of 3th August 2015.

Data for secondary schools in this databook also include data from “technical” secondary schools if they are not separately shown or especially mentioned.

No part of this databook may be duplicated or circulated without prior written consent from the Ministry of Education. Exceptions are citations. Material in the Education Databook 2014 may be cited when this edition is indicated as the source in accordance with good practice and to the extent that the purpose requires.

H. E. António da Conceição
Ministru Edukasaun, Timor-Leste
Dezembu 2015

Foreword

After the successful launch of the first Education Statistical Yearbook 2008/09 and the following yearbooks for 2010, 2011, 2012 and 2013, I am pleased to present the newly introduced Education Databook 2014.

The education databook provides information on the progress of basic and secondary education in Timor-Leste. With the ongoing persistent effort by the EMIS department to improve the quality of data recorded and reported, as well as to build the capacity of staff, some of the indicators have been calculated with more accurate methods and formulae, and more data tables have been added to this databook.

This databook provides a useful reference to understand the progress of and trends in the education system in Timor-Leste. It thus provides evidence to guide key decision makers and planners in developing and monitoring national policies and strategies to address challenges faced in the education sector in this country.

It would not have been possible to produce this yearbook without close collaboration with and support from many committed individuals and international organizations. However, this databook is the first product which the EMIS Department played most of major roles and has developed by themselves with minimum assistance on its quality assurance from development partner. This databook can be considered as a result of improved capacity of EMIS Department of MoE in Timor-Leste.

Data is very important for planning. The Ministry will therefore aim to produce timely education data, provided in the same school year, to facilitate informed decision making. Pre-school data is also presented in the same clear, summarized and systematic manner in this databook.

H. E. António da Conceição
Minister of Education, Timor-Leste
December 2015

Rekoñesimentu

Livru Dadus Edukasaun 2014 la bele prepara laho kompromisu no apoiu hosi Diretór Eskola, Koordenadór Eskola, GAT sira, Adjuntu Diretór Eskola no profesór sira iha eskola hotu hotu, pontu fokál EMIS no Diretór Edukasaun Distritu sira iha distritu hotu hotu, pesoál EMIS no asesór sira. Acknowledgements

The Education Databook 2014 could not have been prepared without the commitment and support of all School Directors, School Coordinators, GATs, Deputy School Directors and teachers in all the schools, EMIS focal points and District Education Directors in all the districts, EMIS staff and advisor, EMIS data entry clerks, and all the individuals within the National Directorate of Planning, Finance, Administration and Logistics.

We are grateful for the support and commitment received from UNICEF in the quality assurance process.

B. Population

Population Size

The population size presented here is based on the "Recommended Scenario" population projection for 2014 based on the adjusted census population figures of Census 2010 made by the National Statistics Directorate (NSD). Although the population sizes used in *Education Statistical Yearbook 2011, 2012 and 2013* were also based on the population projection "Recommended Scenario" by the NSD, the calculation of education indicators in the previous *Education Statistical Yearbook 2010* was based on unadjusted census population data of Census 2010 which may result in different proportions being calculated. Therefore care must be taken when analyzing the trend.

The population projection for 2014 indicates that Timor-Leste has a population of 1,212,107 or about 2.7 per cent (32,038 inhabitants) more than in 2013.

Males are in the Majority

Males remained in the majority in the 2014 projection. Males comprise 51 percent or slightly more than half of the Timor-Leste population. The number of males is higher than females in most of the age groups except the 30–34 years and 65 years and above age groups.

Young Population

The population with age up to 18 years old forms more than half of Timor-Leste's population (50.9 per cent) (Figure B.1). About 16.2 per cent of the population is cycles 1 & 2 (primary) school age children (196,242 children), 6.6 per cent is cycle 3 (Pre-Secondary) (80,533 children) and 6.7 per cent is secondary (78,667) school age children. There is no major change in these school age proportions compared to the 2013 figures.

C. Formal School Structure in Timor-Leste

The formal school system (Table C.1) starts from pre-school education² which is non-compulsory.

Basic education follows pre-school education. It is compulsory and free, and covers the first nine years of schooling (cycle 1, 2 & 3; primary and pre-secondary levels).

Basic education covers three cycles:

Cycle 1: Grades 1 – 4;

Cycle 2: Grades 5 – 6; and

Cycle 3: Grades 7 – 9.

The articulation between the three cycles follows a progressive sequence, with each cycle being responsible for completing, expanding and broadening the previous one, within a perspective of the global unity of basic education. Cycle 1 and cycle 2 or grades 1 to 6 are equivalent to the primary school level. Cycle 3 or grades 7 to 9 is equivalent to the pre-secondary school level.

Following basic education, secondary education has a duration of three years (grades 10 – 12). Students can choose whether to continue their studies along an academic path or a professional path. For this purpose, secondary education has general secondary and technical-professional secondary streams. Students who successfully complete technical-professional secondary education shall receive, in addition to the secondary education diploma, a level 4 professional training certificate. All students who complete general or technical-professional secondary education may apply to continue their studies at a public or private university, the selection to which is done through an Admission Examination.

Students from general or technical-professional secondary education who do not obtain entry to university, or who decide against it, may apply to higher technical education. Students who, for any reason, do not complete general or technical-professional secondary education but who complete a level 4 professional training course also may apply to higher technical education.

Table C.1 The Structure of the Formal School System in Timor-Leste

Education Level in Timor-Leste	Pre-School Education		Basic Education			Secondary Education	
			Primary		Pre-Secondary		
			(Cycle 1 & 2)		Cycle 3		
Education Cycle and Category	-		Cycle 1	Cycle 2		General	Technical
Grade	Group A	Group B	Grades 1 - 4	Grades 5 - 6	Grades 7 - 9	Grades 10 - 12	
Official School Age	3-4	5 to Primary Entry Age	6-9	10-11	12-14	15-17	

In addition, Timor Leste uses a school management system based on the “Escola Basica” concept, which organises schools into geographical “clusters” composed of:

Basic Schools: large and modern, located at the communication centre of the cluster, these schools provide education for the three cycles of basic education (G1 to G9) and will have extensive infrastructural facilities. There is one basic school per cluster of schools, with approximately 250 in total.

Medium Size Filial Schools: these were the traditional “Primary Schools”, which provided education only for Cycles 1 and 2 (G1 to G6). There are a limited number of this type of filial schools per cluster (approximately 3 to 7)

Small Size Filial Schools: these are often remote schools which normally provide education for Cycle 1 and are directly associated with the closest primary school. For each cluster, there is a management structure that is located at the basic school.

² Pre-Schools considered in this report are the ones officially registered by the Pre-School Directorate at MoE as of the beginning of the 2014 academic year. Although there are several “pre-schools” organized by NGOs, communities or other private sector organisations without being formally registered in MoE, these were not counted in this report.

¹) Fonte dados: Projesaun Populasaun "Senáriu Rekomendadu" ba tinan 2014 hosi DEN/Data source: "Recommended Scenario" Population projection for 2014 by NSD.

Projesaun populasaun ba tinan 2012 hosi DEN hatudu projesaun tuir nível nasional no projesaun tuir nível distritál. Maibé, soma ba projesaun populasaun iha kada distritu hatudu diferente oituan hosi projesaun populasaun tuir nível nasional. Maske tabela iha leten uza projesaun tuir nível nasional, tabela sira seluk exeptu tabela 2 iha relatóriu ida-ne'e uza projesaun tuir nível distritál no soma ba nível distritál atu hatudu populasaun nível nasional ba kualker kalkulasaun ba indikadór sira. Porezemplu, populasaun totál iha tabela iha leten (projesaun populasaun tuir nível nasional) mak na'in 1,148,958 embora iha de'it na'in 1,148,950 (Soma projesaun populasaun tuir nível distritál).

The population projection for 2012 by NSD provides a projection at the national level and a projection at the district level. However, the sum of the population projections in each district is slightly different from the population projection for the national level. Although the above table used the projection for the national level, the other tables except table 2 in this report used the projection by district level and the sum of the district level to represent the national level population for any calculation of indicators. For example, the total population in the above table, based on the population projection for the national level, is only 1,148,958, while the sum of the population projection for each district is 1,148,980.

F/G: Labarik Feto/Girls, M/B: Labarik Mane/Boys, T: Total/Total

OOSC rates in some districts or education levels show 0.00 per cent in the graphs and tables in this report. However, in reality, some children out of school may exist in these areas as of today. This is because the OOSC rate calculation is based on the population projection of the 2010 census results and not the actual number of the population in 2014. Children in the school also might have already dropped out from school or children out of school might have moved to these areas after the 2012 EMIS data was collected.

Dadus ne'ebé apresenta iha leten foti hosi EMIS ho data 7 Julho 2014/EMIS data as of 7th July, 2014.

Dili iha taxa tranzisaun liu husi pursentu 100 tanba alunu sira muda ba Dili ba eskola sekundária ne'ebé uluk rejista ona iha eskola pre-sekundária sira iha distritu sira seluk. Kuandu alunu sira, ne'ebé promove (matrikula) ba nivel tuir mai nian iha distritu seluk duke sira nia distritu orijinal ne'ebé sira ramata sira klase uluk, konta ba taxa tranzisaun husi sira nia distritu orijinal, taxa tranzisaun husi distritu ida-idak sei hatudu figura diferente. Iha relatóriu ida-nee, kalkula taxa tranzisaun hotu simplesmente husi número alunu sira eziste iha klase uluk no klase pasajen iha distritu, no LA konsidera alunu sira ne'ebé muda ona ba distritu seluk ba pasajen klase iha sira nia distritu orijinal.

Dili had a transition rate of more than 100 per cent because students moved to Dili for secondary school who were previously registered in pre-secondary schools in other districts. If the students who are promoted to(or enrolled at) the next level in a district other than their original district where they graduated from the previous grade, then they are counted for the transition rate of their original district. This changes the transition rates for affected districts. In this report, all transition rates are calculated purely by the number of students existing in both the previous grade and the promoted grade in the district, without taking into account the students who moved to another district after being promoted in their original district.
